PROFESSIONAL SUMMARY

Product designer who creates intuitive, user-centred designs that solve real problems and enhance user experiences. I have led a design project end to end, collaborated closely with developers and delivered solutions under tight deadlines, combining creativity, empathy and problem-solving to craft impactful products. I thrive in collaborative environments and am passionate about turning ideas into elegant, functional solutions.

WORK EXPERIENCE

08/2026 – Present

UI/UX Designer — Umini Studios (Sankofa)

Nigeria · Contract

Key duties and responsibilities:

- Contributed to the design of a financial-literacy simulation app that helps young Africans aged 7–22 build practical financial knowledge through engaging, game-based learning.
- Designed key user journeys and interfaces, including onboarding, story introduction, character selection and player setup, to create an engaging entry point for users.
- Designed the learning and in-app shop experiences, integrating educational content with interactive product features.
- Collaborated with another product designer to refine screens, connect user flows and maintain consistency across the product.

12/2025 – Present

UI/UX Designer — Naelix Tech Group of Companies

Nigeria · Full-time

Key duties and responsibilities:

- Led end-to-end product design, from research and ideation to wireframing, prototyping and final UI delivery.
- Translated business requirements and user needs into intuitive, user-centred design solutions.
- Collaborated closely with product managers, developers and stakeholders to define product strategy and feature requirements.
- Maintained and contributed to design systems to ensure visual consistency and scalability across products.
- Managed multiple projects at once, consistently delivering high-quality work on schedule.

11/2025 – 04/2026

Product Designer — Flowsate

Nigeria · Contract

Key duties and responsibilities:

- Designed key external-facing pages, including the Flowsate homepage, creating intuitive user journeys and strengthening the brand’s presence across the platform.

- Designed digital products and features for live and upcoming projects, translating requirements into functional, user-centred interfaces.
- Created and maintained design systems and style guides to ensure consistency across screens and support efficient implementation.
- Represented the design team in client meetings, communicating design decisions, gathering feedback and aligning solutions with client expectations.
- Collaborated with graphic designers, developers and stakeholders to turn project requirements into cohesive design solutions.

08/2025 – 10/2025

UI/UX Designer — Tech Studio Academy

Nigeria · Internship

Key duties and responsibilities:

- Collaborated on the design of an event-management website, covering both the public-facing pages and the administrative dashboard.
- Designed user interfaces and user flows for visitors' interactions with the website and administrators' management tasks.
- Worked with fellow designers and developers to support a smooth transition from design to implementation.
- Supported development teams with design specifications, assets and documentation for handoff.

PERSONAL PROJECTS

Eventra — event-management website

- Collaborated as part of the design team on Eventra, an event-management platform, aligning design solutions with product goals and user requirements.
