PROFESSIONAL SUMMARY

As a product designer, I create intuitive, user-centred designs that solve real problems and enhance user experiences. With hands-on experience leading a design project, collaborating with developers, and delivering solutions under tight deadlines, I combine creativity, empathy, and problem-solving to craft impactful products. I thrive in collaborative environments, and I am passionate about turning ideas into elegant, functional solutions.

WORK EXPERIENCE

08/2026-Present

UI/UX Designer — Umini Studios: Sankofa, Nigeria (Contract)

Key Duties and Responsibilities:

- Contributed to the design of a financial-literacy simulation app aimed at helping young Africans aged 7–22 develop practical financial knowledge through engaging, game-based learning experiences.
- Designed key user journeys and interfaces, including onboarding, story introduction, character selection, and player setup, to create an engaging entry point for users.
- Designed learning and in-app shop experiences, supporting the integration of educational content and interactive product features.
- Collaborated with another product designer to refine screens, connect user flows, and maintain consistency across the product experience.

12/2025-Present

UI/UX Designer — Naelix Tech Group of Companies, Nigeria (Full-time)

Key Duties and Responsibilities:

- Translated business requirements and user needs into intuitive, user-centred design solutions.
- Collaborated closely with product managers, developers, and stakeholders to define product strategy and feature requirements.
- Maintained and contributed to design systems to ensure visual consistency and scalability across products.
- Managed multiple projects simultaneously, delivering high-quality work within deadlines.
- Led end-to-end product design processes from research and ideation to wireframing, prototyping and final UI delivery.

11/2025-04/2026

Product Designer — Flowsate, Nigeria (Contract)

Key Duties and Responsibilities:

- Designed key external-facing pages, including the Flowsate homepage, to create intuitive user journeys and strengthen brand presence across the platform.
- Designed digital products and features for both live and upcoming projects, translating project requirements into functional, user-centred interfaces.
- Created and maintained design systems and style guides to ensure consistency across screens and support efficient design implementation.
- Represented the design team in client meetings, communicating design decisions, gathering feedback, and aligning proposed solutions with client expectations.
- Collaborated with graphic designers, developers, and stakeholders to translate project requirements into cohesive design solutions and support implementation.

08/2025-10/2025

UI/UX DESIGNER — Tech Studio Academy, Nigeria (Internship)

Key Duties and Responsibilities:

- Collaborated on the design of an event management website, working on both public-facing pages and the administrative dashboard.
- Collaborated with fellow designers and developers to support the transition from design to implementation.
- Designed user interfaces and user flows to support visitors' interactions with the website and administrators' management tasks.
- Supported development teams by providing design specifications, assets, and documentation for smooth handoff.

PERSONAL PROJECTS

Eventra website

- Collaborated as part of the design team on Eventra, an event management platform, to align design solutions with product goals and user requirements.
